Extended oil Drain interval (ODI) potential is based on the average of US Class 8 engine manufacturer's recommendations. Results will vary depending upon vehicle/equipment type, fuel consumption, maintenance practices, temperature, and variable driving/operating conditions. Consult the engine/vehicle OEM & Chevron before implementing extended ODIs, especially if the engine/vehicle is under warranty. \*\*Improvement vs. SAE 1W-40 oil in class 8 diesel engine bench testing. Actual savings will vary depending upon vehicle/equipment type, load, temperature, and variable driving/operating conditions.

# CANADIAN ICE MELTER

CANADIAN-ICE-MELT-20 20kg bag **\$19.98/bag**

### CANADIAN ICE MELTER

*is the most popular and powerful ice melter. With a blend of high strength calcium chloride pellets, sodium chloride salt and CMA, it melts ice down to -32°C (-25°F). The exothermic qualities generated accelerate melting and make other ingredients perform better.*

- Has a high ice melting capacity at extreme temperatures as low as -32°C.
- Penetrates fast through ice and snow pack and undercuts the bond with pavement.
- The high strength calcium chloride melts faster and melts more ice than road salt.
- Does not harm vegetation, or properly air-entrained concrete when used as directed.
